Solid State awarded Transport for London contract

</div>

Solid State plc (AIM: SOLI), the specialist value added component supplier and design-in manufacturer of computing, power, and communications products, is delighted to announce that it has been awarded a contract to help deliver a new One Person Operation CCTV system for Transport for London, as part of the Piccadilly Line Upgrade on the London Underground Network.

The new digital system will be utilised on the Piccadilly line, which will benefit from 94 new state-of-the-art Tube trains from 2025. It will allow real time IP video images of the platform edge (the "mind the gap" area) to be transmitted to, and displayed, on in-cab screens for driver awareness.

Steatite will be providing custom-designed computers for use on the trains and within the wider station-based system. Carrier boards with specialist display outputs are being designed by Steatite's Imaging business, Active Silicon, to be utilised at the heart of the onboard system. The finished systems will be tested to various rail-standards using Steatite's in-house EMC testing chamber and environmental test facility, allowing de-risking of the project prior to carrying out official certification at an independent test house.

Matthew Richards, Managing Director of the Systems division, said:
"We are very excited to be involved in this project. By drawing on Steatite and Active Silicon's technical prowess, this is a superb example of our ability to utilise multiple skill sets within the business to overcome complex challenges, and to design, test and implement a world-class solution."

Notes to Editors:

Solid State plc (SOLI) is a value added electronics group supplying commercial, industrial and military markets with durable components, assemblies and manufactured units for use in specialist and harsh environments. The Group's mantra is - 'Trusted technology for demanding applications'. To see an introductory video on the Group - https://bit.ly/3kzddx7

Operating through two main divisions: Systems (Steatite & Active Silicon) and Components (Solid State Supplies, Pacer, Willow Technologies & AEC); the Group specialises in complex engineering challenges often requiring design-in support and component sourcing for computing, power, communications, electronic, electro-mechanical and opto-electronic products.

Headquartered in Redditch, UK, Solid State employs approximately 300 staff across UK and US, serving specialist markets in industrial, defence and security, transportation, medical and energy.

Solid State was established in 1971 and admitted to AIM in June 1996. The Group has grown organically and by acquisition - having made 12 acquisitions since 2002.
