#### **SOLID STATE PLC**

#### **UNAUDITED PRELIMINARY RESULTS FOR THE YEAR ENDED 31 MARCH 2009**

#### **CHAIRMAN'S STATEMENT**

#### Results

The profit before tax of the Group was £614,501 (2008: £424,442) on revenue of £12,521,786 (2008: £10,724,333). The basic earnings per share amounted to 7.9p (2008: 5.4p). The pre-tax profit for the year ended 31st March 2008 is stated after charging non-recurring costs of the re-organisation at Paddock Wood of £57,863.

### **Dividends**

The Directors recommend that a final dividend of 2p per share be paid. An interim dividend of 1p per share was paid in January 2009 giving a total dividend in respect of the year of 3p per share (2008: 2p per share). The final dividend will be paid on 7th September 2009 to shareholders on the register at the close of business on 28th August 2009.

### **Trading Review**

The key performance indicators measured by management are sales, bookings and gross profit margins. Bookings are sales orders received.

#### **Solid State Supplies**

Whilst bookings slowed during the second half of this financial year in line with the outlook in our interim statement, sales increased by 3% compared to the first half year. This compares favourably with our industry association AFDEC which reported a contraction in the market for 2008 of -5.8%. Order patterns at present have shifted away from placing longer term schedules to requirements for immediate delivery thus preserving our order backlog which is 14% higher than the same period last year. Gross profit margins were impacted during this year as a result of the sudden devaluation of sterling against the US dollar. However, our currency hedging strategies protected us against the worst effects of this devaluation.

Although we have recently seen some improvement in certain areas of the distribution market, conditions remain uncertain and we are therefore keeping tight control on our overheads. During this fiscal year we broadened our product range in our focus areas of embedded processing/connectivity and power semiconductors and modules. We believe there will be further opportunities for new product lines following the recent wave of consolidation in our industry which together with the steps we have already taken mean we are well placed to take advantage of the upturn in the general economy when it comes.

## **Steatite and Wordsworth Technology**

Trading in both companies remains strong. Sales in Steatite were up 22.4% compared to the previous year, whilst Wordsworth sales were up 25.8% compared to the previous year. Key

customer contracts within military and the oil industry played a major part in both companies' growth.

The decline in sterling, however, impacted on the gross margins with a decline from 31.1% to 27.8%. Nevertheless the higher turnover level ensured that the level of gross profit overall increased by almost £250,000 with net profit before tax increasing by 10.7%.

The economic climate continues to affect the manufacturing sector but both companies are well positioned to mitigate the current recession with major bids in place and due to be awarded during the first quarter. New product developments based on lower power systems will assist in growing the business whilst helping the company's commitment to design more environmentally sustainable systems.

We will continue to pursue our strategy with value added products, whilst endeavouring to enhance margins with particular attention to exchange rate fluctuations over the ensuing months. We will benefit from reduced overheads following the combination of the two businesses into one company.

The outstanding order book remains strong with a workforce that is skilled and tuned to the business needs. We remain cautiously optimistic for the future.

#### **Summary**

These results record a strong year with a 16.7% increase in turnover and an increase in pre-tax profit from £424,442 to £614,501. This has been achieved despite the very significant decline in the value of sterling against the US dollar and the general economic climate.

The effects of the recession have been evidenced by relatively low bookings throughout the Group in the last few months of the year and a tendency for customers to take a cautious approach to placing larger medium term orders, but several sound contracts have been achieved since the balance sheet date and the Directors consider the Group is well placed to trade through the forthcoming months when the UK economy is expected to remain in recession and to benefit from an economic upturn when the UK economy recovers.

The Group continues to look for suitable UK acquisitions within the electronics industry.

#### **Peter Haining**

Chairman 4 August 2009

#### MANAGING DIRECTOR'S REVIEW

The principal activities of the Group during the year continued to be those of the distribution of electronic components and materials and the manufacturing of electronic equipment.

The key performance indicators recognised by management are sales, bookings and group profit margins. Bookings are sales orders received.

An overall review of the Group's trading performance and future developments is given in the Chairman's Statement.

The Directors consider the results for the year to be very satisfactory especially in view of the decline in the value of sterling against the US dollar which has had the effect of increasing the costs of the majority of the group's purchases and the general decline in the UK economy.

The risk of a serious erosion of gross profit margin arising from the currency fluctuations has been offset to some extent by relatively short term hedging arrangements for the purchase of dollars, and by converting sales to dollars rather than sterling in many cases. The success of this policy is evidenced by the fact that the group gross profit margin only declined to a relatively limited extent from 30.9% to 28.1%, and the overall 16.8% increase in turnover resulted in an increase in gross profit from £3,310,394 to £3,514,300.

There is a risk in the current economic recession of a decline in bookings which would result in a decline in billings. Analysis of the ratio of bookings to billings (the book to bill ratio) shows that for the first half of the year under review across the group this amounted to 1.026: 1 but had declined to 0.939: 1 for the year as a whole. This reflected lower levels of bookings in all areas of the group in the last months of the financial year, and this has been reflected in group turnover which for the first three months of the new financial year has been 15.9% lower than for the same period last year. However since the balance sheet date the group has been successful in concluding negotiations on several large contracts for delivery in the current financial year and the book to bill ratio for the three month period has been 1.663: 1 which indicates that turnover in the next few months should be relatively strong.

Overheads were carefully controlled with an increase of less than 2% over the previous year and the net profit before tax amounted to £614,501 compared with £424,442 in the previous year.

The distribution market remained difficult and Solid State Supplies did well to achieve a small increase in its turnover. The range is being expanded and recent amalgamations within the industry should provide opportunities to further extend the range in the current year.

At Redditch, the loss of revenue in the military sector recorded last year is being reversed and Steatite is being very successful in acquiring large contracts in the military sector as well as in batteries and ruggedised computers. The ICP division, where many customers are end users on a small scale, has shown the effects of the recession and pressure on margins here is particularly acute.

The Group has continued to invest in research and development activities at Redditch with expenditure of approximately £150,000 in the year, particularly in the area of industrial batteries for military purposes. The Group has continued to improve its websites which are considered a major marketing tool.

The Group finances its operations by a mixture of retained profits, bank borrowings and invoice discounting facilities. The two bank loans were cleared during the year and the Directors are pleased to note that the net tangible assets have increased by over £370,000 in the year.

The Group is mainly exposed to credit risk from credit sales. It is Group policy to assess the credit risk of new customers and to factor the information from these credit ratings into future dealings with the customers. At the balance sheet date there were no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet. The Directors monitor the liquidity and cash flow risk of the Group carefully. The Group has an agreed overdraft limit with the Group's bankers to help manage fluctuations in cash flow. Cash flow is monitored by the Directors on a regular basis and appropriate action is taken where additional funds are required.

The success of the Group's policies on credit sales is evidenced by the fact that the provision in the year was £28,000 which is less than 0.3% of turnover.

The Group continues to look for suitable UK acquisitions within the electronics industry.

# NOTES TO THE FINANCIAL STATEMENTS For the year ended 31st March 2009

1. The financial information in the preliminary announcement does not constitute the company's statutory accounts for the years ended 31st March 2009 or 31st March 2008. The financial information for the year ended is derived from the statutory accounts for that year which have been delivered to the Registrar of Companies. The auditors reported on those accounts; their report was unqualified, did not include references to any matters to which the auditors drew attention by way of emphasis without qualifying their reports and did not contain statements under the Companies Act 1985, s 237(2) or (3). The financial information for the year ended 31 March 2009 is unaudited. Statutory accounts for that will be finalised on the basis of the financial information presented by the directors in this preliminary announcement and will be delivered to the registrar of Companies following the company's annual general meeting.

#### 2. ACCOUNTING POLICIES AND CRITICAL ACCOUNTING JUDGEMENTS

The financial information in this preliminary announcement has been prepared using the recognition and measurement principles of International Accounting Standards, International Financial Reporting Standards and Interpretations adopted for use in the European Union (collectively Adopted IFRSs). The principal accounting policies used in preparing the preliminary announcement are those the group will apply in its financial statement for the year ended 31 March 2009 and are unchanged from those disclosed in the group's Report and Financial Statements for the year ended 31 March 2008.

#### 3. EARNINGS PER SHARE

The earnings per share is based on the following:

	2009 £	2008 £
Earnings	485,831	330,080
Weighted average number of shares	6,156,511	6,156,511
Diluted number of shares	6,156,511	6,156,511
Earnings per share	7.9p	5.4p
Diluted earnings per share	7.9p	5.4p

Earnings per ordinary share has been calculated using the weighted average number of shares in issue during the

year. The weighted average number of equity shares in issue was 6,156,511 (2008: 6,156,511).

The Diluted earnings per share is based on 6,156,511 (2008: 6,156,511) ordinary shares which allow for the exercise

of all dilutive potential ordinary shares.

Certain employee options have not been included in the calculation of diluted EPS because their exercise is

contingent on the satisfaction of certain criteria that had not been met at the end of the year. In addition, certain

employee options have also been excluded from the calculation of diluted EPS as their exercise price is greater

than the weighted average share price during the year (ie they are out-of-the-money) and therefore it would not be

advantageous for the holders to exercise the options.

The number of shares included in the option agreement which have not been included in the calculation of the

weighted average number of shares was 634,920 (2008: 380,231).

#### 4. DIVIDENDS

	2009 £	2008 £
Final dividend paid for the prior year of 1.25p per share (2008: 2p)	76,957	123,130
Interim dividend paid of 1p per share (2008: 0.75p)	61,565	46,174
	138,522	169,304
Final dividend proposed for the year 2p per share (2008: 1.25p)	123,130	76,956

The proposed final dividend has not been accrued for as the dividend was declared after the balance sheet date.

## 5. SEGMENT INFORMATION

The Group's primary reporting format for segment information is business segments which reflect the management

reporting structure in the Group. The distribution division includes Solid State Supplies Limited and the manufacturing

division includes Wordsworth Technology Limited and Steatite Limited which incorporates RZ Pressure.
